**SPECIFIC REQUIREMENTS ON THE USSR STATE
COMMITTEE FOR RADIO ELECTRONICS**

In addition to the general requirements on the State Committee for Radioelectronics as set forth in paragraph 8 of the attached statement of Priority Gaps in Intelligence on the USSR Electronics Equipment Industry, the following specific requirements are submitted:

- A. What is the organizational breakdown of the State Committee for Radioelectronics?
- B. What are the functions of the State Committee and in what ways does it differ from the Ministry - either in theory or in practice?
- C. Does the reporting of production data and plan fulfillment go through the State Committee for Radioelectronics? What is the relationship between the State Committee and the State Planning Committee?
- D. Are there any plants producing electronic equipment which have primary accountability to a State Committee other than the State Committee for Radioelectronics.
- E. Does the State Committee for Radioelectronics play a direct role in intra-bloc planning and coordination of production of electronic equipment? Is the State Committee represented on CEMA sub-committees dealing with production of electronic equipment?
- F. Does the State Committee for Radioelectronics exercise direct centralized control over priority military production programs?
